ALI TAHER

lool0x01 | Bug Bounty Hunter

github.com/alielbadry hackerone.com/lool0x01 linkedin.com/in/alielbadry365

SUMMARY

Full-time bug bounty hunter. I break the seam between what an application shows you and what it will actually do for you - authorisation, sessions and business logic, on the programs where the bar is highest.

RECOGNITION (reports accepted)

Google VRP (web & access control) - Krisp - Circle - Hostinger
Mozilla - Acronis - HackerOne - Deezer

NUMBERS

53 reports submitted 15 programs recognised
08 bug classes 01 tool shipped

FOCUS

Broken access control (IDOR / BOLA / BFLA)
Authentication and session flaws
Business logic and race conditions
Multi-tenancy and trust boundaries
SSRF, OAuth / OIDC, injection and cloud exposure

TOOLING

Burp Suite - Caido - ffuf - Nuclei - Subfinder - httpx - Katana
Python - JavaScript - Docker - Linux - Git

PROJECTS

burpee-switch - multi-account Chromium extension (MIT licence)
github.com/alielbadry/burpee-switch
Google VRP write-up - published on LinkedIn
